DETAILED ACTION

102 Rejections Withdrawn

The rejection of claims 11-19 under 35 USC 102(b), maintained in the Final Rejection, has been withdrawn. Applicant's arguments have been carefully considered and are persuasive, vide infra.

103 Rejections Withdrawn

The rejection of claims 1-4 and 6-10 under 35 USC 103(a), maintained in the Final Rejection, has been withdrawn. Applicant's arguments have been carefully considered and are persuasive, vide infra.

Allowable Subject Matter

Claims 1-4 and 6-19 are allowed. The following is an examiner's statement of reasons for allowance:

Applicant cogently argues that a key aspect of the instant invention is the lack of a "filler" in the distillation column and that the teachings of the prior art of record cannot be reasonably extrapolated to encompass the instant process, inter alia, for that reason. The examiner is now in agreement with applicant, in particular, that a filler, or lack thereof, cannot be reasonably considered part and parcel of a reaction vessel – the core of the rejections. The rejections are therefore untenable.

Art Unit: 1621

The cited prior art neither teaches nor suggests the instant process. Nor would it have been obvious to one of ordinary skill in the art at the time of the invention to modify the teachings of the prior art in order to arrive at that of the instant invention. There is no motivation to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
